

Powdering of flavours on potatoe snacks

Objectives of the project:

Continuous flavouring of potatoe snacks

- More than 10 qualities of different flavours, from salt to curry, onion...
- Powdering on a width of 1 m
- Continuous output flow
- Operation 24 h/ day
- Short cleaning time
- Stability of flow requested : +/- 10%

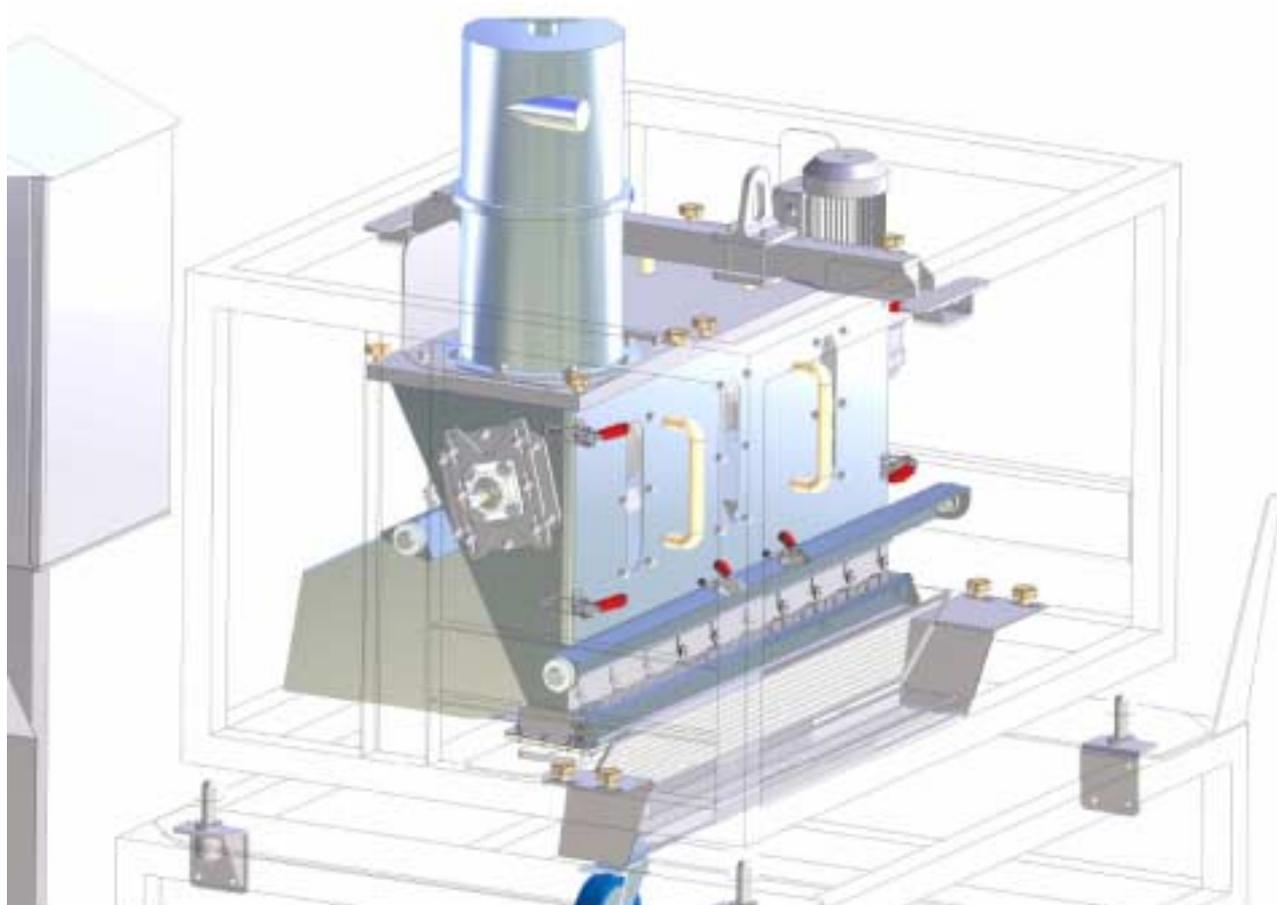

Solution:

- Linear powdering machine
- Width: 1 m
- With the same configuration of the feeder, it is possible to powder all flavours.
- The system, designed according GMP rules, is integrated on stainless steel structure that can be handled with a crane, to facilitate cleaning operation.
- The feeder is continuously refilled with a vacuum conveyor. The equalization of level of powder in the storage hopper is made with a screw.
- Adjustment of output flow of flavor with frequency inverter.
